Cheat sheet

Every renamed term from the game, with its story and where the old name still shows up.

STATUS 30 OCT 2026 | ROLLOUTS ARE STAGED | NOT AFFILIATED WITH ATLASSIAN

CURRENT, CLOUD

01

WAS ISSUE

Work item

Jira, JSM, 2025

THE STORY

Atlassian wanted one neutral word for every kind of team. Issue can sound like a problem to people outside software, while work and work item fit tickets, tasks and requests alike. The rollout started in March 2025, Free and Standard plans first.

STILL SEEN IN

JQL still says issue. Existing APIs, parts of admin and help docs too. Jira Data Center: no plans announced.

Read the source (community.atlassian.com)

02

WAS ISSUE TYPE

Work type

Jira, 2025

THE STORY

A side effect of the issue to work item change: the types of items got the matching word. Epic, Story and Task are work types now.

STILL SEEN IN

The REST API and JQL still say issuetype.

Read the source (community.atlassian.com)

03

WAS PROJECT

Space

Jira, JSM, JPD, 2025/26

THE STORY

Atlassian says it lines Jira up with Confluence, which already says spaces, and frees the word project for the new cross-tool Atlassian Projects. A space also suits ongoing work that has no end date. Reaction was mixed: some people find it clashes with Confluence terms.

STILL SEEN IN

JQL still says project. Some help docs too. Atlassian Projects is a different, new thing.

Read the source (jirareleases.atlassian.com)

04

WAS AUTOMATION RULE

Flow

Jira Automation, Studio, 2026

THE STORY

Atlassian says flow describes better how you build and manage an automated process. Community members point out that it sits very close to workflow. A third-party report ties the change to the new step-based billing.

STILL SEEN IN

Docs mix rule and flow. Many people confuse flow with workflow.

Read the source (confluence.atlassian.com)

05

WAS AUTOMATION COMPONENT

Step

Jira Automation, 2026

THE STORY

Part of the same update as rule to flow: the automation editor now talks about steps instead of components and has cleaner step titles.

STILL SEEN IN

Older screenshots and videos.

Read the source (confluence.atlassian.com)

06

WAS ANALYTICS

Insights

Atlassian Analytics app, Oct 2026

THE STORY

The app grows from charts into a data context layer: governed metrics, shared definitions and lineage that also feed Rovo. Atlassian announced it on 7 Oct 2026, with a phased rollout after Team '26 Europe.

STILL SEEN IN

Doc URLs still say /analytics/. The rollout comes in phases.

Read the source (www.atlassian.com)

07

WAS PRODUCTS

Apps

Atlassian Administration, 2025/26

THE STORY

Part of Atlassian's System of Work and the move toward one platform: each product is now an app. Announced at Team '25 and rolled out first in Atlassian Administration, then emails, docs, audit logs and URLs.

STILL SEEN IN

Admin mails, audit logs and URLs follow over time.

Read the source (confluence.atlassian.com)

08

WAS ATLASSIAN ACCESS

Atlassian Guard

Admin and security, before 2026

THE STORY

Guard is Atlassian's security and organization management app. The sources I found do not say when or why it was renamed; 2026 release notes only mention the old name.

STILL SEEN IN

Release notes still write: formerly known as Atlassian Access.

Read the source (confluence.atlassian.com)

09

WAS JIRA WORK MANAGEMENT

Jira

Licensing and name, 2024/25

THE STORY

Announced at Team '24: Jira Software and Jira Work Management become one product called Jira. Jira Work Management stopped being sold on its own on 1 May 2024, and migrations ran from 29 Oct to 13 Dec 2024.

STILL SEEN IN

The project types business and software remain.

Read the source (seibert.group)

10

WAS QUEUES (DEFAULT VIEW)

List view

Jira Service Management, 2025/26

THE STORY

The default queue view became one of several ways to look at the work items in a queue. Since 2026, space admins can also rename navigation items such as Queues.

STILL SEEN IN

Space admins can also rename Queues to Cases or Requests.

Read the source (confluence.atlassian.com)

11

WAS CUSTOM FIELDS (ADMIN

Fields

Jira admin, 2025

THE STORY

The first step toward simpler field management for admins: a redesigned Fields page that also lists fields created by Jira or by apps.

STILL SEEN IN

Older training slides.

Read the source (confluence.atlassian.com)

12

WAS COPY (PAGE ACTION)

Duplicate

Confluence, 2025

THE STORY

Atlassian updated the label of the action so it says what it does. The release note gives no longer reason.

STILL SEEN IN

Older how-to articles.

Read the source (confluence.atlassian.com)

13

WAS LIVE PAGES

Live docs

Confluence, 2025

THE STORY

Live docs are now their own content type next to pages, and a live doc can be converted to a page and back.

STILL SEEN IN

Developer docs use both.

Read the source (community.developer.atlassian.com)

14

WAS ANCHOR MACRO

Anchor link macro

Confluence, Jan 2025

THE STORY

Atlassian's release blog calls it the anchor link macro, formerly the anchor macro, and says it was updated to look and function more intuitively. The post names no separate reason for the new name.

STILL SEEN IN

The Confluence Data Center documentation still says Anchor Macro.

Read the source (confluence.atlassian.com)

15

WAS FABRIC

Whiteboards

Confluence, 2024/25

THE STORY

Fabric stopped being a standalone app and became whiteboards inside Confluence Cloud. Later they moved into the page tree next to pages.

STILL SEEN IN

Old announcements and talks.

Read the source (community.atlassian.com)

16

WAS USER-CREATED ACTIVITY

In-app data

Audit log settings, Oct 2025

THE STORY

Atlassian reworded the audit log setting to improve clarity.

STILL SEEN IN

Older admin guides.

Read the source (confluence.atlassian.com)

17

WAS ATLASSIAN INTELLIGENCE

AI features

Bitbucket Cloud settings, Jul 2026

THE STORY

Bitbucket pulled all AI settings into one AI menu. In that menu Atlassian Intelligence is now called AI features, with Agentic pipelines and Rovo Dev next to it.

STILL SEEN IN

Only in Bitbucket workspace settings. Elsewhere the name stays.

Read the source (confluence.atlassian.com)

18

WAS ROADMAP (BASIC VIEW)

Timeline

Jira Software, before 2026

THE STORY

The basic roadmap view in Jira Software projects became Timeline. Plans were not affected. In 2026 a unified Timeline for Jira Software spaces followed, and the rollout drew complaints.

STILL SEEN IN

Plans (advanced roadmaps) were not renamed.

Read the source (community.atlassian.com)

19

WAS OPSGENIE

Operations

Incident management, 2025 to 2027

THE STORY

Atlassian folded Opsgenie into its other apps: incident management goes to Jira Service Management, alerting and on-call to Compass or JSM. Sales ended on 4 Jun 2025 and support ends on 5 Apr 2027.

STILL SEEN IN

Sales ended 4 Jun 2025, support ends 5 Apr 2027. Moves into JSM or Compass.

Read the source (www.atlassian.com)

20

WAS LEGACY ASSETS (CUSTOM

External assets platform

Jira Service Management, after 2022

THE STORY

The field was first renamed Legacy Assets. Developers objected to the wording, so Atlassian renamed it again to External assets platform.

STILL SEEN IN

The field was first called Assets, then Legacy Assets.

Read the source (community.developer.atlassian.com)

21

WAS JIRA CORE

Jira Work Management

Jira Cloud, 28 Apr 2021

THE STORY

Announced on 28 Apr 2021. Jira Work Management replaces Jira Core and is built for business teams, with a simpler interface, a List view and templates that use words like tasks instead of stories and bugs.

STILL SEEN IN

Older docs and blog posts.

Read the source (techcrunch.com)

22

WAS ATLAS

Home

Atlassian Home, May 2024 to Mar 2025

THE STORY

Not a plain rename. Atlassian said at Team '24 that Atlas would be retired as a product: new workspaces stopped on 1 May 2024, and its goals, projects, teams and topics became free platform experiences in Atlassian Home. Existing customers were migrated from 17 Feb 2025, and all were done by 27 Feb 2025.

STILL SEEN IN

The community group is still called Atlas Group. Atlassian Focus is a different, enterprise product.

Read the source (community.atlassian.com)

CLOUD AND DATA CENTER

23

WAS INSIGHT

Assets

Jira Service Management, 2022

THE STORY

A name change only: the functionality stayed. Assets replaced Insight in navigation, buttons, roles and docs, in Cloud and in Data Center 5.3. Insight Discovery became Assets Discovery. The sources I found give no longer reason.

STILL SEEN IN

Old API paths /Insight still work next to /Assets. Data Center got it with JSM 5.3.

Read the source (community.atlassian.com)

24

WAS IQL

AQL

Jira Service Management, 2022

THE STORY

The query language followed the product: Insight Query Language became Assets Query Language. Same functionality, new name.

STILL SEEN IN

iqlFunction still works next to aqlFunction.

Read the source (confluence.atlassian.com)

25

WAS PORTFOLIO FOR JIRA

Advanced Roadmaps

Jira, 2020

THE STORY

Renamed in 2020. In Cloud you open it through Plans in the navigation. Data Center keeps the name Advanced Roadmaps.

STILL SEEN IN

Data Center still says Advanced Roadmaps; the menu says Plans.

Read the source (confluence.atlassian.com)

26

WAS JIRA SERVICE DESK

Jira Service Management

ITSM, 9 Nov 2020

THE STORY

Announced on 9 Nov 2020. Atlassian said the product had grown beyond a help desk by adding Opsgenie-powered incident management. Existing customers moved over automatically.

STILL SEEN IN

Portal URLs still contain /servicedesk/ and the API is /rest/servicedeskapi/.

Read the source (www.techzine.eu)

HISTORY

27

WAS STASH

Bitbucket Server

Source code, Sep 2015

THE STORY

Atlassian put its Git products under one Bitbucket name: Cloud, Server and Data Center. Stash became Bitbucket Server, Stash Data Center became Bitbucket Data Center.

STILL SEEN IN

Stash Data Center became Bitbucket Data Center.

Read the source (confluence.atlassian.com)

28

WAS GREENHOPPER

Jira Agile

Agile boards, Aug 2013

THE STORY

Part of an Aug 2013 push to simplify product and add-on names. Atlassian said the products themselves stayed the same.

STILL SEEN IN

Later part of Jira Software.

Read the source (www.atlassian.com)

29

WAS BONFIRE

Jira Capture

Bug reporting, Aug 2013

THE STORY

Renamed together with GreenHopper in Aug 2013, to simplify product and add-on names.

STILL SEEN IN

Old blog posts.

Read the source (www.atlassian.com)

30

WAS ATLASSIAN ONDEMAND

Atlassian Cloud

Hosting, 15 Dec 2014

THE STORY

In Jul 2014 Atlassian relabeled its deployment options Cloud and Server. On 15 Dec 2014 it retired the OnDemand name for the hosted service on its website, docs and support.

STILL SEEN IN

Deployment options were relabeled Cloud and Server in Jul 2014.

Read the source (www.atlassian.com)

31

WAS JIRA

Jira

The name itself, 2017

THE STORY

A Community answer ties the lowercase spelling to Atlassian's 2017 corporate rebrand with new logos. I did not find Atlassian's own page on it.

STILL SEEN IN

Old docs and logos.

Read the source (community.atlassian.com)

32

WAS ADD-ONS

Apps

Marketplace, around 2017

THE STORY

Marketplace wording moved from plugins to add-ons (around 2012) and then to apps (around 2017). Sources disagree on the dates. Atlassian later described add-ons, integrations and more as types of apps.

STILL SEEN IN

Sources differ on the exact date. Old URLs say plugins.

Read the source (community.atlassian.com)

33

WAS JIRA AGILE

Jira Software

Jira, 6 Oct 2015

THE STORY

JIRA Software 7.0 brought all the agile functions of JIRA Agile into one product for software teams. Upgrading from JIRA or from JIRA plus JIRA Agile was free for customers with active maintenance.

STILL SEEN IN

Old community threads still say Jira Agile.

Read the source (confluence.atlassian.com)

34

WAS AGILECRAFT

Jira Align

Enterprise agile planning, 10 Apr 2019

THE STORY

Atlassian acquired AgileCraft for about 166 million dollars in spring 2019 and launched it as Jira Align on 10 Apr 2019 at Atlassian Summit in Las Vegas, to bring its agile-at-scale solution together with Jira.

STILL SEEN IN

Older articles about the acquisition.

Read the source (community.atlassian.com)

35

WAS TEAM CENTRAL

Atlas

Teamwork directory, 2022

THE STORY

Atlassian announced the new name Atlas for its teamwork directory and replaced former mentions of Team Central, including in the community group.

STILL SEEN IN

Old announcements. The community group is still called Atlas Group.

Read the source (community.atlassian.com)
